

tracMo Android Broadcast

This document is for tracMo Developers and Community

Introduction

If you are an Android developer and you want tracMo works with your app, the simplest way is to receive the broadcast messages sent from tracMo Android App. It sends broadcast message for every tracMo activities. You can implement broadcast message receiver in your app, and your app will work with tracMo nicely.

Broadcast Message Format

Action Name: "tracMoCommand"

Key: "tracMoAction"

Value: "arrive", "away" and "click"

Key: tracMoAddress

Value: BD Address, e.g. "54:4A:16:77:C9:2F"
